NIKESH KUMAR SAH

Aspiring AI Engineer | Python Developer | Machine Learning | Generative AI

Kathmandu, Nepal | Phone: +977 9814292623 | Email: sahnikesh2022@gmail.com

LinkedIn: linkedin.com/in/nikesh-kumar-sah-281735246 | GitHub: github.com/nikesh623 | Portfolio: nikeshkumarsah.com.np

PROFESSIONAL SUMMARY

Aspiring AI Engineer and Bachelor of Information Management (BIM) undergraduate with practical academic experience in Python programming, machine learning, artificial neural networks, natural language processing, and intelligent agents. Experienced in developing Python-based applications and REST APIs using FastAPI and Flask, with additional exposure to Docker, Git, GitHub, Google Colab, and AI-assisted development tools. Completed an AI Engineering learning journey and earned AI Orchestrator certificates. Demonstrates a strong foundation in software development, analytical thinking, problem-solving, and continuous technical learning. Seeking an opportunity as a Junior AI Engineer, AI Developer, or AI/ML Intern to contribute to practical projects while developing professional expertise.

EDUCATION

Bachelor of Information Management (BIM) **Expected Graduation: 2026**

Shanker Dev Campus, Tribhuvan University, Nepal | Academic Status: Ongoing

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, C

AI & Machine Learning: Machine Learning Fundamentals, K-Nearest Neighbors (KNN), Artificial Neural Networks (ANN), Multi-Layer Perceptron (MLP), Natural Language Processing (NLP), Intelligent Agents, Generative AI Fundamentals, Prompt Engineering

Python Libraries & Frameworks: NumPy, Pandas, Scikit-learn, NLTK, Flask, FastAPI, Pydantic

Web Development & APIs: HTML, CSS, JavaScript, REST API Development, Django Fundamentals

Databases: SQL, SQLite, MySQL, PostgreSQL Fundamentals

Development Tools & Technologies: Git, GitHub, Visual Studio Code, Docker, Docker Compose, Google Colab, Ollama, GitHub Copilot

Productivity Tools: Microsoft Word, Excel, PowerPoint

AI AND MACHINE LEARNING PROJECTS

AI/ML Laboratory Exercises

Python | Google Colab | Scikit-learn | NLTK

- Implemented and explored intelligent-agent concepts, including simple reflex and model-based agents, through a simulated environment.
- Performed basic Natural Language Processing tasks using NLTK, including tokenization, word-frequency analysis, and part-of-speech tagging.
- Developed a K-Nearest Neighbors (KNN) classification model using the Iris dataset.
- Implemented an Artificial Neural Network using Scikit-learn's MLPClassifier for letter-recognition classification.
- Explored generative AI tools, their capabilities, and practical applications.

Student Profile REST API
Python | FastAPI | Pydantic | Uvicorn

- Developed a practice REST API for collecting and validating student profile information.
- Implemented structured data validation using Pydantic models.
- Applied email validation and field constraints for improved data integrity.
- Tested API endpoints locally using Uvicorn and explored interactive API documentation.

SOFTWARE DEVELOPMENT PROJECTS

Dockerized Flask Form Application
Python | Flask | Docker | Docker Compose

- Developed a Flask-based form application using HTML templates and static resources.
- Configured Docker and Docker Compose for containerized application development.
- Practised application configuration, dependency management, and local deployment.

Personal Portfolio Website
HTML | CSS | JavaScript | GitHub | Vercel

- Developed a personal portfolio website to present technical skills, academic background, projects, and professional information.
- Used GitHub for source-code management and Vercel for deployment.
- Published a professional online portfolio to support career development and job applications.

Pocket Consultancy – Academic Project Proposal
Django | PostgreSQL | HTML | CSS | JavaScript

- Co-developed an academic project proposal for an education consultancy management platform.
- Designed proposed features for student profiles, university matching, counsellor booking, document review, and application tracking.
- Documented the proposed system architecture, user roles, and development phases.

PROFESSIONAL DEVELOPMENT AND CERTIFICATIONS

AI Orchestrator Workshop **Outskill**

- Successfully completed the AI Orchestrator Workshop (Issued by Vaibhav Sisinty, Founder, Outskill).

AI Engineering Learning Journey **B10X Institute**

- Completed an AI Engineering learning journey and earned two AI Orchestrator certificates.
- Developed further exposure to AI engineering concepts and AI-assisted workflows.

PROFESSIONAL EXPERIENCE

Private Tutor **2022 – Present**
Independent

- Provide academic tutoring in Mathematics, Science, and Computer Fundamentals.
- Support more than 10 students through subject explanations, practice exercises, and individual learning assistance.
- Adapt teaching approaches to students' learning needs and academic progress.
- Strengthen communication, analytical thinking, and problem-solving skills through teaching.

COMMUNITY SERVICE

Community Service Volunteer

- Contributed to community-support activities and assisted more than 50 individuals and families.
- Supported people through volunteer work and community-oriented initiatives.
- Developed teamwork, communication, and interpersonal skills.

ADDITIONAL INFORMATION

Languages: Nepali, English

Areas of Interest: Artificial Intelligence, Machine Learning, Generative AI, Python Development, Natural Language Processing, Software Engineering, and Data Science

Career Objective: Junior AI Engineer | Associate AI Engineer | AI Developer | Junior Machine Learning Engineer | AI/ML Intern
